

## Rotating Filing System

made in Germany

## The Filing Revolution

### Space Saving

The Rotafile filing system enables more efficient storage by making it possible to gain up to 70% more space.

### Design

They have a faultless, professional look and are the practical and versatile option for any environment.

### Green Office

Rotafiles have very low emissions, which makes them an environmentally friendly choice.

# spacesaving

Wall space is the resource in shortest supply in offices. moll rotary files require less floor space and wall space than standard shelving with the same storage capacity. Thanks to the fact that less distance needs to be covered to access the files, and that the files themselves take up less space, this compact round storage system for files makes it possible to more effectively utilise office and filing space.

## standard shelving

<b>Shelf Capacity</b>	192 binders
<b>Wall space required</b>	264cm wide
<b>Amount of space required</b>	$2.64 \times 1.15 = 3.0\text{sqm}$

## rotafile

<b>Shelf Capacity</b>	192 binders
<b>Wall space required</b>	93cm wide
<b>Amount of space required</b>	$0.93 \times 1.73 = 1.6\text{sqm}$

Ø 93cm

# various diameters

The **80 cm** rotary files can hold a maximum **24 wedge-shaped binders** per level.

The **93 cm** rotary files can hold a maximum **32 wedge-shaped binders** per level.

# various heights

**compactfile**  
column fully rotating

**multifile**  
individually rotatable levels

In moll rotary files there is not just room for classical binders: practically all standard media, such as vertical files, endulum files, magazines, CDs etc. can be stored in these columns. Thanks to the fact that the height of the individual levels is variable, it is also possible to store a wide variety of formats within the same column: A5, A4, Folios as large as A3
