

FLO™

GO WITH THE FLO...

Flo uses a geometric spring system (GSS) to provide the greatest range of articulation of all 'dynamic' monitor arms and a movement that is the smoothest and lightest available for easy screen adjustability.

...AND TREAD LIGHTLY ON THE ENVIRONMENT

- Flo has an exterior of unrivalled design purity, clean surfaces, and a minimalist appearance
- Provides optimum performance using minimum number of parts

...TO FUTURE-PROOF THE WORKPLACE

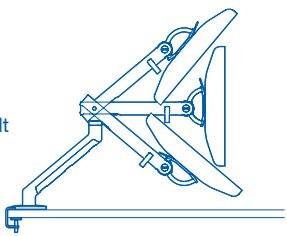

- Flo has the greatest range of articulation of all 'dynamic' monitor arms, enabling screens to be interchangeable as input (touch) or output (reading) devices
- Facilitates different screen set-ups according to the requirements of the working environment

...TO ENSURE PERFECT INSTALLATION, SAVE TIME, AND WORK EFFICIENTLY

- Flo features a unique visual indicator weight gauge on its forearm and an adjustable tension feature
- Delivers significant reductions in installation time while ensuring that all screens are set to the optimum tension for the screen weight
- Ensures improved usability and efficiency savings for users

FLO TECHNICAL SPECIFICATIONS

- Maximum monitor weight: 9kg (20lb)
- Arm reach: 515mm (20.6")
- Vertical adjustment: 341mm (13.4")
- Monitor head: 40° upward tilt, -40° downward tilt
- VESA 75 and 100 compliant
- Available in silver
- Made of 54% recycled material with 99% of Flo comprised of reusable material
- Lifetime warranty
